

# OUR SERVICES

## LEAK DETECTION ON UNDERGROUND PIPELINES

To detect all kinds of leaks in pipelines at an early stage, The Sniffers provides various methods which all have a common goal: to increase your network safety and continuity.

## PIPELINE CORROSION INTEGRITY MANAGEMENT

Our specialised service line of non-destructive coating inspection surveys enables The Sniffers to optimise the protection of your pipeline systems, without having to excavate. To minimise corrosion The Sniffers offers a complete installation, control and optimisation program for cathodic protection. An unbearable system to protect your underground iron structures.

## PIPELINE INSPECTIONS & MAINTENANCE SERVICES

Avoiding pipeline accidents through inspections is crucial. We simultaneously execute maintenance tasks to secure the quality of your infrastructure.

## THIRD PARTY INTERFERENCES

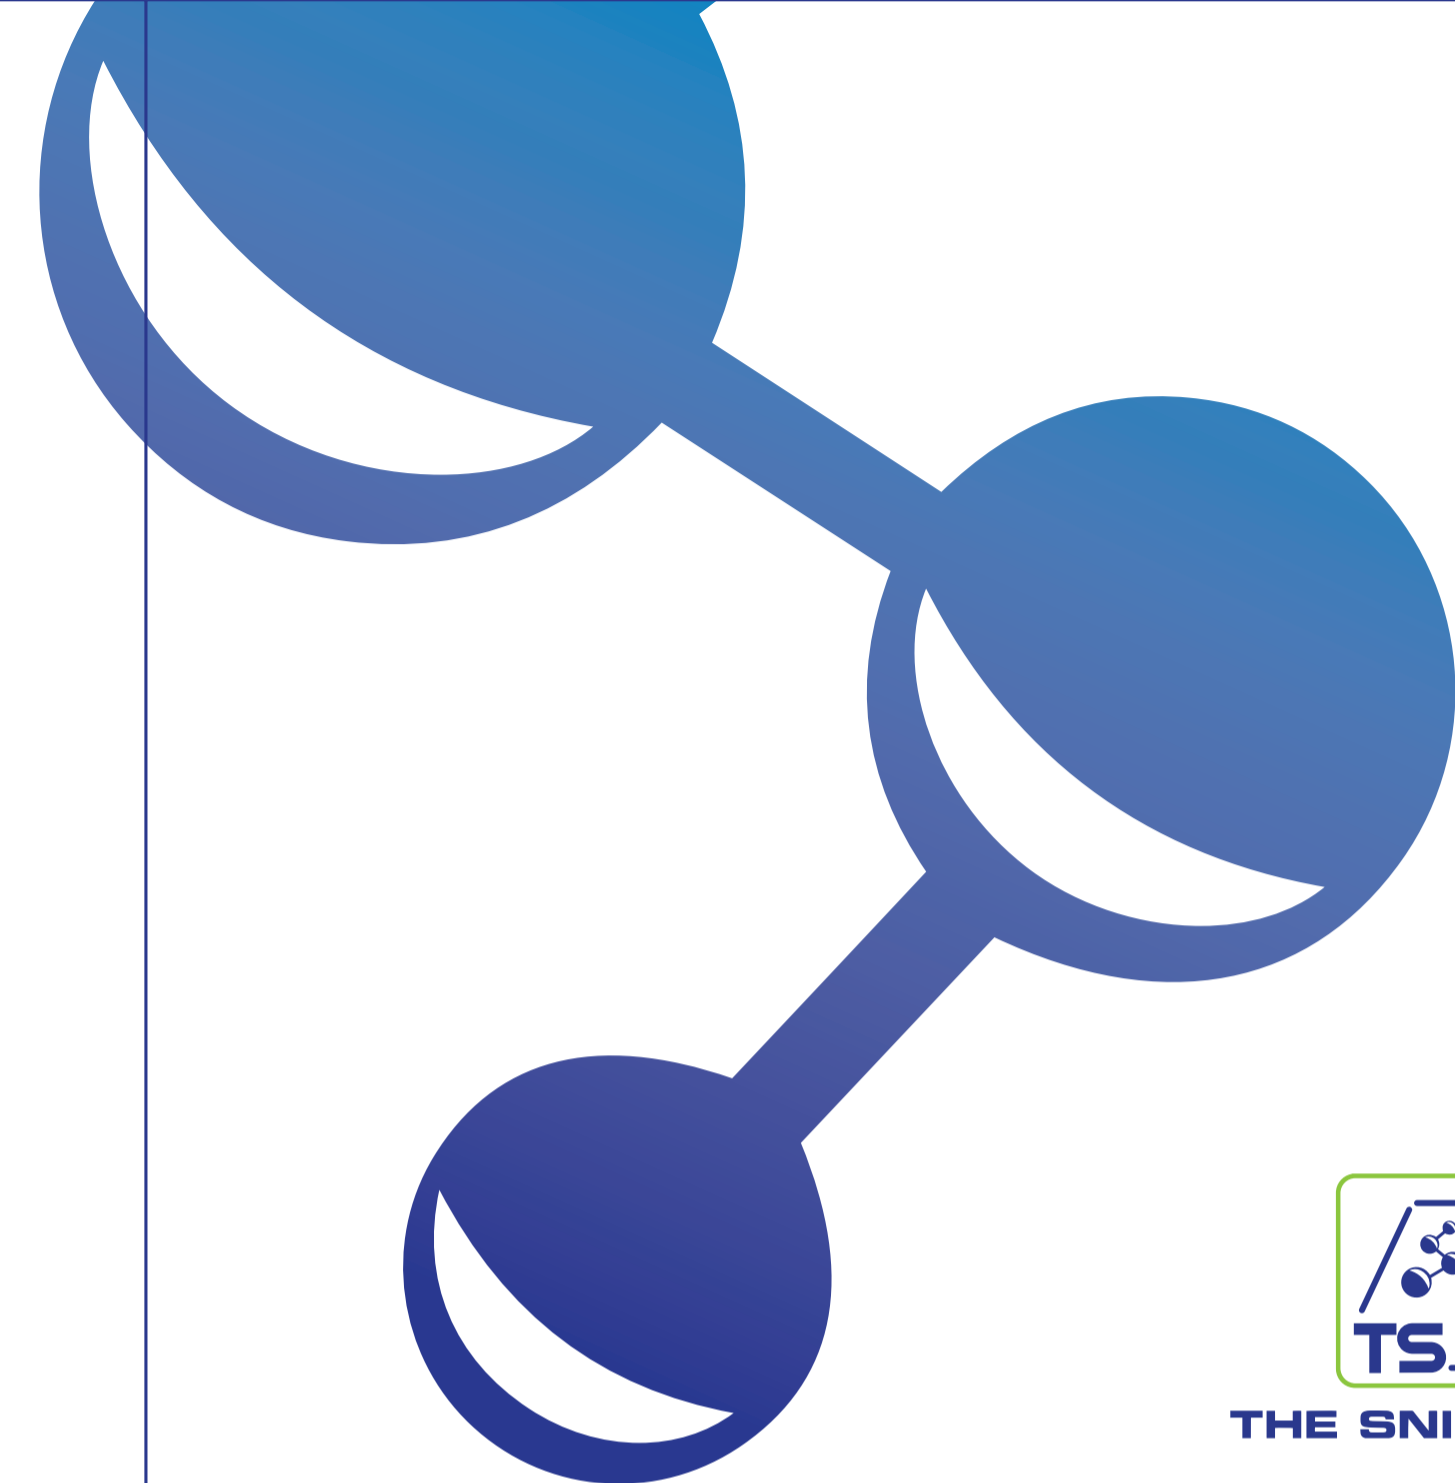

Third party interference is the major cause of pipeline accidents. The Sniffers is your perfect partner for a complete third party registration and follow-up.

## PIPELINE & CABLE LOCALISATION - DIGITALISATION

The Sniffers has its own program to localise underground pipelines and cables and to determine their depth without having to excavate. All gathered data can easily be imported in your Geographical Information System (GIS) or our software "PERSEUS".

## OTHER PIPELINE SERVICES

By combining different services and know-how we can quickly deploy new techniques. Through constant innovation, whilst staying on top of the latest developments and using the very latest proven techniques, we are able to present our clients with solutions that have been exactly tailored to satisfy their every project need.

# ABOUT US

The Sniffers is a renowned leading expert in pipeline maintenance and management. We detect and analyse all kinds of leaks and defects in above & below ground pipeline infrastructures. By means of advanced surveys & analysis, resulting in your project specific advice we enable you to extend the life of your pipelines and cables. Transparently, efficiently and honestly. As an independent party we offer you an effective and integrated solution to optimise your company's pipeline network. The result: reduced risk of accidents, a better protection of your infrastructure, more cost savings. All the while complying with (local) regulations.

The Sniffers takes pride in assisting you with a personalised **one-on-one service** to fully satisfy your project needs. **Each project is custom-made.**

## COMPREHENSIVE APPROACH

The Sniffers is an all-rounder. From leak detection and inspection services to cathodic protection surveys. We have pioneered specially trained dogs that are able to detect leaks which cannot be measured by the best available detection services. A unique and very successful method. The Sniffers is the first company in the world to have TÜV certified dogs. Our experience in all sorts of pipeline inspection services resulted in the development of our own software product that makes it possible to accurately manage any pipeline infrastructure and its objects.

## INTERNATIONAL EXPERTISE

The Sniffers is an esteemed market leader in pipeline maintenance and management. With more than 20 years of experience we have built up expertise in numerous small scale and multinational projects. The result? Knowledge that can be applied internationally and more than 200 loyal clients.

## EXPERTS IN LOCAL REGULATIONS

Every country, region or client has its own legislative requirements & guidelines. Our specialists are experts in understanding & interpreting local regulations, guidelines and protocols.

## HIGHLY ADVANCED SOFTWARE

The Sniffers has developed its own software tool that is tuned to pipeline data management, making it one of the most advanced, flexible and practical on the market!

## SAFETY & QUALITY

Safety and quality are our priorities. We use the most innovative measurement equipment and are VCA and ISO 9001 certified. This requires the continuous improvement of our services and a quality guarantee to all our clients. Safety, health and a better environment are our key areas.

# OUR APPROACH

1. To prepare				
2. To inventurise				
3. To monitor				
4. To report				

## 1. TO PREPARE

The Sniffers collects all technical information about your company infrastructure and carries out a detailed analysis of all pipeline sources. In cooperation with the clients we determine the scope of the project and the appropriate survey methods. We clearly outline the goals and processes in a work plan.

## 2. TO INVENTURISE

All gathered data is put in a database with the aid of our intelligent software. We clearly map all elements and conduct a quality control.

## 3. TO MONITOR

We accurately monitor each object in your infrastructure and survey all kinds of above pipeline infrastructures. The Sniffers monitors as an objective independent party, you are in for repair.

## 4. TO REPORT

The Sniffers generates a repair order or advice that includes detailed information on all non-conformities and recommendations for further investigation, optimisation or repair. It enables you to have a clear overview of possible safety issues at any stage of the pipeline network lifecycle. After the actions are taken, we monitor the end result.

# OUR SOFTWARE SOLUTIONS

A successful pipeline management project relies on a powerful all-in-one database. The Sniffers provides a self-developed and complete relational software solution to collect, monitor and report all your pipeline data: "PERSEUS", an advanced Pipeline Information Management System (PIMS) with mobile applications.

As owner of this software product, we continuously improve and adjust these products to fully guarantee your satisfaction and to adjust to any situation.

# ADVANTAGES

## GIS

Geographic Information System based on Google Maps

## GPS TRACKING

Each action is continuously traced and integrated in our database

## USER FRIENDLY

Control and update an enormous data structure in only a few clicks per object

## WEB-BASED

Manage your database by a personal login on [www.the-sniffers.com](http://www.the-sniffers.com)
